WASHINGTON, Jan. 18, 2012—TODAY, Agriculture Secretary Tom Vilsack will host a national media conference call to announce disaster assistance to help farmers, land owners, communities and others recover and rebuild after a year in which a wave of natural disasters swept across all regions of the United States. The funding will provide assistance to help rebuild and repair land damaged on account of flooding, drought, tornadoes and other natural disasters in 33 states and Puerto Rico.

A strong farm safety net is important to sustain the success of American agriculture. To help keep American agriculture profitable, USDA immediately responds to disasters across the country, ranging from record floods, droughts and tropical storms, with direct support, disaster assistance, technical assistance, and access to credit.
