Final performances March 8 – 9 teach local students important water lessons

Davenport, Iowa. (March 8, 2010) – Iowa American Water and The National Theatre for Children, based in Minneapolis, Minnesota, are bringing the live theatrical show, **“Alice in Water Land”**

to 12 local elementary schools in the Iowa Quad Cities. Final performances are scheduled at four local elementary schools on March 8 – 9.

A schedule of performances dates/times and a program summary is included at the end of this release.

The presentations by the National Theatre for Children are part of Iowa American Water’s youth education program. Iowa American Water has worked to enhance water education in area classrooms for decades by sponsoring an annual poster contest for over 20 years and sponsoring local Newspapers in Education “Water” and “Earth Day” issues. The Theatre for Children is an extension of that effort to bring water and conservation education to local elementary school students.

The National Theatre for Children, a Minnesota-based national touring company, works with corporations to relay their educational and public messages to students. Using simple sets and audience participation, the troupe will be presenting their program to hundreds of students in Iowa American Water’s service areas throughout eastern Iowa. The shows share information on water education, water usage tips, and pollution control with students in a fun, interactive atmosphere.

About Iowa American Water Iowa American Water, a wholly owned subsidiary of American Water (NYSE: AWK), provides high-quality and reliable water and/or wastewater services to approximately 200,000 people. Founded in 1886, American Water is the largest investor-owned U.S. water and wastewater utility company. With headquarters in Voorhees, N.J., the company employs more than 7,000 dedicated professionals who provide drinking water, wastewater and other related services to approximately 15 million people in 32 states and Ontario, Canada.
