Stops in Mount Pleasant, Marshalltown, Spencer, Pella, Corning and Reinbeck

(DES MOINES) – Lt. Gov. Kim Reynolds today announced a series of town hall meetings across Iowa about the importance of giving students a great education in science, technology, engineering and math. Reynolds is co-chair of the Governor’s Science, Technology, Engineering and Mathematics (STEM) Advisory Council along with Mary Andringa, Vermeer Corp. CEO. The Council’s overarching goal is raising student interest and achievement in STEM and building a stronger STEM workforce pipeline.

The tour this spring will update Iowans on the progress being made by the Council, showcase student STEM presentations and seek feedback from community members about how the Council should set STEM priorities moving forward. Governor Branstad, Mary Andringa and local business leaders will join Reynolds at select town halls.

“Having the opportunity to engage with the students, parents, educators and workforce who are directly impacted by the Council’s work is extremely rewarding and eye-opening,” explained Reynolds. “These stops around the state will give us a look at the successes and the opportunities for further growth in the future.”

About the Iowa Governor's STEM Advisory Council

Established in July 2011 by executive order, the Iowa Governor's STEM Advisory Council is a public-private partnership focused on increasing student interest and achievement in science, technology, engineering and mathematics (STEM) and promoting STEM economic development. The Council works to engage and prepare students for a career-ready path, regain our state's historic leadership position in education, and provide a vital competitive economic advantage. The 45-member Council is chaired by Lt. Gov. Kim Reynolds and Vermeer Corp. CEO Mary Andringa. For more information, visit www.IowaSTEM.gov.
