Starting on Wednesday April 13, 2011, work will begin on the Duck Creek stream bank located near the Kimberly Road Bridge. This stream-bank restoration project will temporarily affect Duck Creek Golf Course on hole #8, and the Duck Creek Trail between Quad City Radio Group and the Kimberly Road Bridge. Work should only take a few days to complete.

The City of Davenport is committed to keeping the Duck Creek stream and trail system in top condition. This project is needed to restore parts of the stream bed bank, and should only result in a minor inconvenience for a few days. Duck Creek Trail will remain open throughout the project. The project will not effect bikers, walkers or runners using Duck Creek Trail.
