- [Download Lynda.com - Access 2013 Essential Training](#)
- [Discount - Autodesk AutoCAD P&ID 2011](#)
- [Buy Cheap Adobe Creative Suite 4 Design Premium All-in-One For Dummies](#)
- [Buy Frischluft ZbornToy for AE and PrPro \(en\)](#)

The American Lung Association's annual "[State of the Air 2013](#)" report finds that air quality nationwide continues the long-term trend to much healthier air. The strongest progress came in lower levels of year-round particle pollution across much of the nation.

"[State of the Air 2013](#)" is the Lung Association's 14th annual, national air quality "report card." It uses the most recent air pollution data, compiled by the Environmental Protection Agency (EPA) for the two most widespread types of pollution - ozone (smog) and particle pollution (PM 2.5, also known as soot). The report grades counties and ranks cities and counties based on their scores for ozone, year-round particle pollution and short-term particle pollution levels.

Visit the [State of the Air Iowa Report](#) to see how your community ranks and to learn how to protect yourself and your family from air pollution.
