More Than 100 State Cooling Centers Open Across Illinois

CHICAGO – Ahead of another day of extreme heat, Governor Pat Quinn is reminding Illinois residents to take special precautions and make use of the state’s cooling centers. Earlier this week, the Governor opened more than 100 cooling centers around Illinois in order to help those without air conditioning stay cool.

“High heat and humidity is dangerous for everyone on Illinois – young, elderly and in-between,” Governor Quinn said. “I urge residents to take the proper precautions to stay safe as we endure another day of heat.”

The cooling centers are located at Illinois Department of Human Services (IDHS) offices throughout the state. IDHS cooling centers are open to the public during regular business hours from 8:30 a.m. to 5 p.m. on weekdays. In addition to the IDHS cooling centers, the Illinois Tollway Oases in the Chicago area are available 24 hours a day, seven days a week.

Governor Quinn and the Illinois Department of Public Health are encouraging everyone in Illinois to watch for signs of heat-related illnesses. Symptoms of heat-related illness include headaches, skin that is hot to the touch, increased body temperature, loss of consciousness, seizures and irregular heartbeats.

To stay cool and avoid illness, people should increase their fluid intake, but avoid drinks with caffeine, alcohol and sugar; decrease strenuous, outdoor physical activity; and remain in air-conditioning when possible.

The Illinois Department on Aging also encourages relatives and friends to make daily visits or calls to senior citizens living alone. When temperatures and humidity are extremely high, seniors and people with chronic health conditions should be monitored for dehydration and other effects of extreme heat. Additionally, seniors should eat lighter meals, take longer and more frequent rests, and drink plenty of fluids.

To find a cooling center near you, call the IDHS hotline at [\(800\) 843-6154](tel:8008436154) or visit keepcool.illinois.gov
