WHY: Research shows that 8 out of 10 women are wearing the wrong sized bra. Women should be professionally fitted for a bra once a year to ensure their bra size has not changed as a result of fluctuations in their body.

Breast cancer is the second leading cause of cancer death in American women and accounts for 26% of all cancers among women. Conducting monthly breast self-examination is an important way to detect abnormalities at an early stage. Take 15 minutes to meet with a Wacoal fit expert while contributing to an important cause and sign up for a reminder that could ultimately save your life.
