### **About Road to Recovery**

Every day thousands of cancer patients need a ride to treatment, but some may not have a way to get there. You can help!

How can you be a Road to Recovery Driver? You need:

- A current, valid driver's license
- A good driving record
- Access to a safe and reliable vehicle
- Sufficient limits of automobile liability insurance
- To be in good health
- Complete volunteer driver's application and attend training

The American Cancer Society coordinates the Road to Recovery program, from recruitment, screening and training of these volunteers, to scheduling transportation pickups.

Can you give someone who needs it a ride? Click [here](#) for more info.
