- [Buy Cheap NewBlue Titler Pro](#)

Application control is an increasingly critical part of network security. Much has been said about bringing application visibility and control into network security to prevent applications from slipping by traditional port-based firewalls. A next-generation firewall is a different and revolutionary class of product that solves the problem. But with so many network security vendors selling similar functionality, how do you know if you're getting the real deal? Read this report to learn more about the different capabilities of different products on the market, and to find out the 10 things your next-generation firewall must do.
