April 9th, from 6pm – 7:30pm Scott Stewart, LAc, and Dr. Davis will be discussing the role of the liver as the epicenter of many conditions associated with our Western lifestyle. This installment of the ***Lifestyle Transformation Series*** will take place at Moline Chiropractic Clinic, 4300 12th Ave. Moline.

Often the manifestation of diseased states arise from the high levels of toxicity retained by our body's tissues. This causes people to suffer from fatigue, anxiety, IBS, Crohn's, arthritis, hypertension, allergies, menstrual irregularities, etc. Most of these diseases can be prevented through liver therapy and detoxification.

Dr. Davis and Scott Stewart, LAc. will be spending a good portion of the dialogue on the health benefits of liver detoxification, and how important liver health is in disease prevention.

Seating is limited so please sign - up today! You can reserve a seat by calling (309) 764.47.53 or send an email to healinglotustcm@gmail.com
